

FATIS

FATIS is the **Framework for Automated Tests** in Industry by Sokratel.

FATIS offers a great variety of advantages and benefits. Amongst others FATIS is...

...EASY TO USE

The user interface is called FATIS – Control Tool (FATIS-CT) and was completely developed by Sokratel.

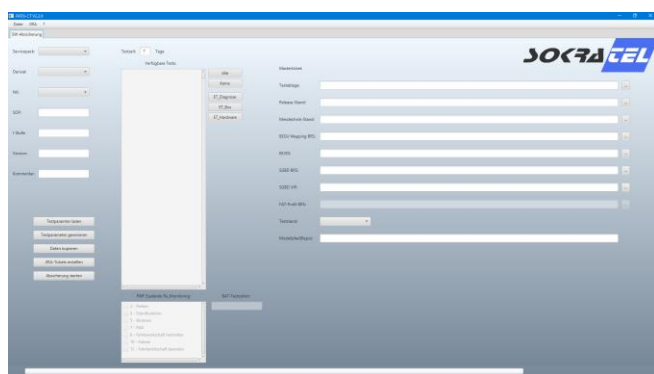

Figure 1: Screenshot FATIS-CT

FATIS-CT allows the starting and configuring of testsuits without directly accessing test benches.

The graphical interface can be customized for particular customer projects and is tailored to meet customer requirements.

Thereby FATIS is easy to use - even for employees with low experience in testing purposes.

...TIME SAVING

FATIS autonomously manages necessary configuration steps for every single test platform – no manual action is needed.

FATIS autonomously copies test results from every single test platform to the configured destination folder – no manual copying is needed.

Test execution with FATIS is much faster und much less error-prone - compared to manual testing.

...SCALABLE

No matter if 10 or 100 test benches – the scalability of FATIS guarantees the best possible load factor for your test resources.

FATIS distributes the test tasks to all available test benches, to reach a as fast as possible execution of all testsuits.

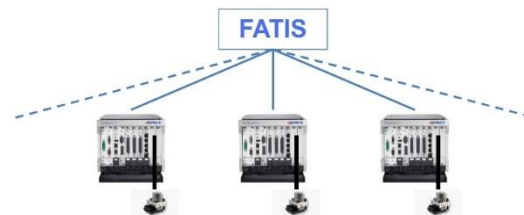

Figure 2: FATIS Scalability

Even with an increased number of test benches there is no additional effort for users - thanks to the scalability of FATIS.

...TRANSPARENT

FATIS provides the monitoring of test states and test results, independent from access to test benches – due to the consequent connection to JIRA.
